

Controlled Access. Audit Capability. Physical Security. System Management.

# NEXGEN<sup>®</sup> Vending Security

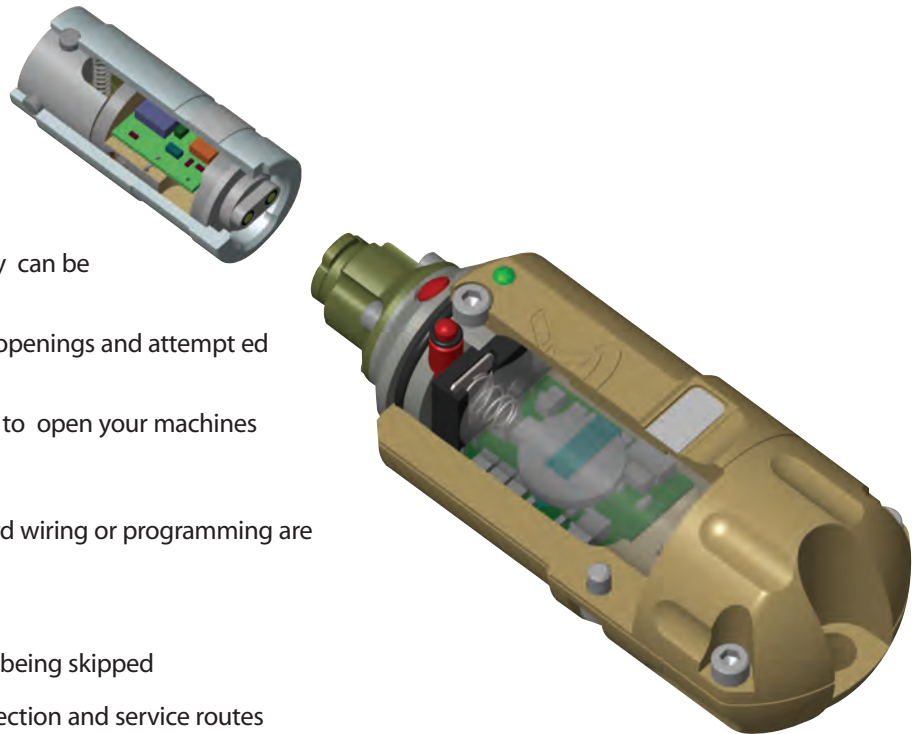

## Intelligent Security for the Vending Industry

In today's business environment, staying profitable means getting more from the assets you already have. NEXGEN is designed to protect your vending machines from theft and trade loss. But more than that, it is a valuable route management tool that can help you run service and collections more efficiently. NEXGEN can improve your security and lead to a substantial return on investment.

NEXGEN is a complete electronic locking system providing Accountability, Controlled Access, Physical Security, and Route Management. A basic system includes electronic locks, a programmable key that operates like a hand-held computer, Docking Stations for programming keys, and VendSecure<sup>®</sup> software.

### Benefits:

- ◆ Control who can access your locks, and when they can be opened
- ◆ Expose the source of internal loss by tracking all openings and attempted openings of the lock
- ◆ Ensure that lost or stolen keys are not being used to open your machines
- ◆ Protect against physical attack
- ◆ Save time and money on installation, since no hard wiring or programming are needed at the lock
- ◆ Eliminate the cost of re-keying mechanical locks
- ◆ Know if scheduled collections or service calls are being skipped
- ◆ Determine if time is being used efficiently on collection and service routes
