

NEXGEN[®] Vault Door

Unattended parking meters make tempting targets for thieves, and stolen or misused keys can result in lost revenue that is impossible to trace. That's why so many cities turn to Medeco for complete parking meter protection.

NEXGEN technology provides a streamlined system for physical security, access control, and accountability. The NEXGEN system is entirely self-contained, eliminating the need for a hand-held computer. The lock contains no mechanical pins and is built to withstand physical attacks such as punching and drilling. Keys can be automatically programmed in groups using the NEXGEN Security Manager software system.

Keys only open the meters you specify and will not operate outside of their time schedules. Both lock and key hold complete records of every opening - or attempted opening - of the meter. NEXGEN virtually eliminates your exposure due to lost or stolen keys while improving the efficiency of your collections.

Benefits:

- ◆ Control access to every meter
- ◆ Track all openings and attempted openings
- ◆ Strong resistance to physical attack
- ◆ No hardwiring allows for easy installation
- ◆ Provides immediate response to lost or stolen keys

Applications:

Parking meters that require access control and audit capabilities.

Ordering Information

EP - 120X - XX

Bracket Type

- 1 = High Capacity (Long Bracket)
- 2 = Low Capacity (Short Bracket)

Finish

- 65 = Grey Powdercoat (Standard)
- 57 = Black Powdercoat (Special Order)

Technical Information:

- ◆ Available with standard or high capacity brackets.
- ◆ Plug face and plug use hardened steel inserts to resist drilling.
- ◆ Lock stores up to 2000 audit events.

Finishes:

- ◆ Grey powdercoat standard.
- ◆ Black powdercoat available as special order.

Warranty:

- ◆ 1 year manufacturer's warranty
