Grand Bend Ontario, Saturday July 19th, 2008

About 100 loyal customers and Medeco employees turned out at Bend Motorplex for Medeco's Customer/Employee Appreciation Day the Races. Everybody enjoyed Bar-B-Q beef sandwiches and refreshments as well as a day of Thundering Loud drag racing.

Al Hinds proudly displayed the Medeco and ASSA ABLOY logos on 2800 horsepower Pro-Modified Corvette, and between races took some time to chat with our customers and employees.

Unfortunately a minor mechanical failure kept the car out of the final rounds, but a great time was had by all. The day ended with a spectacular Fireworks display just before the came.

Logic on Your Home

Have you thought about putting Logic on your home? The powerful electromechanical locking system is becoming well known among homeowners for its appeal and electronic capabilities. For example, a home owner in California enjoys Logic's audit capabilities and instant rekeying features, which allow him to manage who enters and when. Vikki Flam of Flam's Service in Sherman Oaks, CA says the homeowner finds, "comfort in who is going in out of his home as he also runs business from there and confidential files".

Logic is a great solution for homeowners who travel frequently and have service personnel visit their homes while out of town or homeowners with various people entering and leaving their property. To talk with a local Medeco dealer about Logic for your home visit our dealer locator at <http://www.medeco.com/dealers/>.

Securing Our Energy Resources

A white paper discussing the physical security issues related to The Federal Energy Commission (FERC) and the North American Electric Reliability Corporation (NERC), who govern the nation's energy industry and ensure the reliability of the U.S. and Canadian electric power systems, respectively is now available for download [here](#).
