Medeco³ BiLevel for Tailored Security

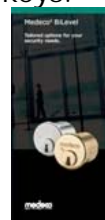

Medeco High Security Locks proudly announces the launch of Medeco³ BiLevel, a locking system with the convenience of integrating both high security and patented key control locks together in one system tailored to fit multiple facility needs. BiLevel cylinders offer affordable key control through patent protected keys. For areas that require protection against picking, bumping, drilling, prying, or other forms of attack, UL 437 Listed Medeco³ may be added to the system.

Standard locking systems without utility patent protected keys allow anyone who gains possession of a key to easily and inexpensively make a copy. With an unauthorized duplicate key, a thief has complete access to a building, its physical and intellectual property, and the people inside. Patent (pending) protected Medeco³ BiLevel locking systems ensure that the keys to a facility can only be duplicated by certified Medeco dealers and only with the proper authorization.

Medeco³ BiLevel may also be part of an electronic access system using Medeco Hybrid keys. The metal blade of the key operates the Medeco³ BiLevel cylinder and proximity in the head of the key is used in a proximity system.

For more information, visit www.medeco.com or call 1-800-839-3157. You can also download the [Medeco³ BiLevel catalog](#) or [Brochure](#).

Medeco Receives High Tech Corporation Award at NCTC TechNite 8.0

Medeco recently received the **High Tech Corporation Award** from the NewVa Corridor Technology Council (NCTC). This council is based in the area around the Medeco headquarters in Salem, VA. On May 10th, NCTC honored the region's best achievements in technology at its annual award banquet, TechNite 8.0. Gordon Malczewski, Medeco's Manager of Customer Service and Technical Training, accepted the award.

The High Tech Corporation Award recognizes outstanding commercial growth and achievement by the local division of a national or multi-national company that produces and markets predominantly high technology-based products or services.

Founded in 1968, Medeco is a market leader in locks and locking systems for security, safety, and control. The company's customer base includes wholesale and retail security providers, original equipment manufacturers, institutional and industrial end-users. Utilizing federal patent protection, and industry leading key control programs, Medeco is able to manage the key blanks and protect against unauthorized duplication. Medeco has established a 40-year record of nearly constant growth. That growth record was a key factor in selecting them as the winner, according to a member of the council.

E-Cylinder Spotlight

LOGIC PRODUCT FAMILY EXPANDING

End-users have shared repeatedly that they love the instant reprogramming, audit trails, and schedules offers by Logic. Now, they will have even more to love as the Logic product family is expanding with deadbolts, padlocks, and cam locks. The deadbolts will be available in both

commercial and residential styles, and the padlocks will be available in both System Series styles and the extreme weather, G8R padlock. The new Logic products will offer the exact same digital master key benefits as the Mortise, Rim, and KIK cylinders.

"Being able to pull an audit trail from a G8R padlock that's on a telecommunications box out in the absolute middle of nowhere is amazing," said one end-user. "And, the fact that everything ties into the same system we use on our trucks, warehouses, offices, gates, and controlled access areas, makes it ideal for absolute control and accountability."

Arrow Spotlight

ARROW OFFERS FREE COUNTER MATS

As an effort to closely relate the advantages of using a professional for your lock security sales and service, Arrow has produced a counter mat titled "I Bring Professional Security Right to your Door". Arrow understands the value of using a security professional and the advantages they bring compared to those of other retailers. To order your copy, go to www.arrowlock.com and click on Literature Request.

There is a new feature to Medeco.com! Finding what you need on our website is much easier through the new site map. A link is posted at the top of every page for your convenience. To view it, [click here](#).

NEW KEY BUMPING VIDEO NOW AVAILABLE ONLINE

We recently released a public service announcement about protecting one's home or business from key bumping, a lock bypassing threat growing in popularity on the internet. The video features information on home and business security, presented by law enforcement officials and locksmith professionals. In addition, a restaurateur talks about his security and what measures he has taken to combat the key bumping threat.

Security IQ: Protecting Against Key Bumping is now available online at <http://www.medeco.com/about/keybumping/>. You can access it through:

- Online streaming on our website
- Download video podcast
- Download version for offline viewing
- Request a DVD version online
- Order the recently updated **All Locks Not Created Equal** brochure (LT-301005-25 Rev C), which contains information on Medeco's security solutions.
